This table reports the unduplicated total number of enrolled PATH clients who received a referral for each PATH service and of those receiving a referral, how many attained the service from the referral during the reporting period. Individuals who received more than one type of services are recorded once in all service categories that apply.

Services Provided

One of PATH's program goals is to link clients to mental health services. A positive outcome would be to see enrollment rates in mental health services increase from entry to exit, indicating that a greater percentage of clients are enrolled in these services at exit than at the start of their PATH program entry. The graph shows the rate of change in mental health services enrollment among all PATH clients at entry and among exited clients, by provider.

Green bars represent increases in the percentage of clients enrolled in mental health services, whereas red bars represent a decrease in the percentage of clients enrolled in mental health services. Larger bars indicate greater changes in mental health services enrollment rates. To evaluate the outcomes for each provider on this measure, rate changes are only shown for clients who have completed their PATH enrollments.
